

GLYPHOSATE MCPA 2,4-D TRIBENURON-METHYL ORGANOSILICONE 2,4-D ESTER  
METSULFURON-METHYL SLUGICIDE

# AGRICHEMICALS

**DONAGHYS**  
PERFORMANCE FIRST

Jeremy Silva  
MANAGING DIRECTOR & FARMER

“ *My promise to you – In the unlikely event of a Donaghys product failing to perform when used as directed, Donaghys will refund the full purchase price of the product concerned.\** ”

#### **DONAGHYS SERVICE PROMISE**

- To have an experienced local territory manager available at all times.
- To provide appropriate training and support for your farm staff in the effective use of our products to attain the results that are expected.
- To respond within 24 hours to any customer request for assistance regarding a Donaghys product.
- Our scientists will be available as technical back-up for your territory manager.
- To continue to research, and develop product and solutions that deliver productivity and economic efficiency.
- To maintain a ‘will not be beaten’ attitude with competitive pricing and offers.
- Free delivery on farm can be arranged.

\*See [www.donaghys.com](http://www.donaghys.com) for full details on product guarantee.

# Donaghys Serious 580

Registered Pursuant to the ACVM Act 1997 No. P7838.

## The strongest liquid glyphosate on the market for powerful non-selective weed control

- Dual salt technology incorporating potassium & triethanolamine salts.
- High concentration retaining low viscosity.
- Fully surfactant loaded.
- Excellent rainfastness.
- Cost effective weed control.
- Fast knockdown.
- Stable in a range of temperatures.

### Available in

20, 200 & 1000 Litres

### Active Ingredient

Donaghys 580g/L glyphosate as the potassium & triethanolamine salts

# Donaghys Premium Sprayoff G360

Registered Pursuant to the ACVM Act 1997 No. P7732.

## For powerful non-selective weed control

- Made with the superior potassium salt, for better uptake and translocation than IPA salt glyphosates.
- Superior rainfast times:
  - 30 minutes with Donaghys Wetter Sticker surfactant
  - 2 hours with no surfactant.
- Cost effective weed control.
- Fast knockdown.
- Stable in a range of temperatures.

### Available in

20, 200 & 1000 Litres

### Active Ingredient

Donaghys 360g/L glyphosate as the potassium salt

# Donaghys Sprayoff Mate

Registered Pursuant to the ACVM Act 1997 No. P7683.

## Selective broadleaf herbicide mix partner for glyphosate

- High strength tribenuron-methyl formulation.
- For tank mixing with glyphosate for control of clovers and tough broadleaf weeds.
- Short withholding period before re-sowing (14 days).
- Non-hormone herbicide with low relative toxicity.
- Easy to use water dispersible granule formulation.

### Available in

1kg

### Active Ingredient

750g/kg tribenuron-methyl

# Donaghys Broadleaf Kill 2,4-D ESTER

Registered Pursuant to the ACVM Act 1997 No. P7706.

## For removing hard to kill broadleaf weeds from established pastures

- Controls thistles, annual buttercups and most other common pasture broadleaf weeds.
- Provides better kill on established / perennial weeds.
- Controls ragwort (seedling to rosette stage).
- Controls thistles from seedling to bud formation stage (prior to flowering).
- Provides better cool temperature results than other phenoxy herbicides.
- Minimise clover check by grazing one week prior to spraying.

### Available in

20 & 100 Litres

### Active Ingredient

520g/L 2,4-D as the ethylhexylester

# Donaghys Broadleaf Kill MCPA

Registered Pursuant to the ACVM Act 1997 No. P7656.

## For removing broadleaf weeds from established pastures

- Controls a wide range of broadleaf weeds.
- Use when weeds are young and growing fast.
- Highly effective on all thistle and buttercup types.
- Highly cost effective herbicide for thistle and weed control.
- Safer for red and subterranean clovers than Ester formulations.
- Also use as a selective cereal herbicide.

### Available in

20 & 100 Litres

### Active Ingredient

375g/L MCPA as the potassium salt

# Donaghys Broadleaf Kill 2,4-D AMINE

Registered Pursuant to the ACVM Act 1997 No. P7647.

## For removing broadleaf weeds from young and established pastures

- Controls most annual broadleaf weeds including thistles.
- Can be used on young pasture\* after grazing with minimal clover damage.
- Use on young weeds that are growing fast.
- Less volatile than Ester formulations; fewer problems with herbicide drift.
- Also use as a selective cereal herbicide.
- Particularly useful in warmer and / or sunnier areas.

### Available in

20 & 100 Litres

### Active Ingredient

400g/L 2,4-D as the triethanolamine salt

\*clover should be established with 6 or more true leaves

# Donaghys Brushweed Kill Met600

Registered Pursuant to the ACVM Act 1997 No. P7684.

## For the control of brushweeds and many broadleaf weeds

- Controls gorse, broom, blackberry and other brushweeds.
- Can be used to selectively control buttercup, ragwort and many thistle and broadleaf species by weed wiper or spot application.
- Can be used for stump swabbing of freshly cut gorse and blackberry stems and stumps.
- Highly cost effective control of most brushweeds.
- Low toxicity herbicide – safer for users.
- Easy to use water dispersible granules.

### Available in

1kg

### Active Ingredient

600g/kg  
metsulfuron methyl

# Donaghys Brushweed Kill TRIPIC

Registered Pursuant to the ACVM Act 1997 No. P7978

## For the control of brushweeds and many broadleaf weeds

- Controls blackberry, broom, gorse, lupin, tutus, sweet briar and matagouri.
- Controls broadleaf weeds including ragwort, thistles, fennel, nettle and inkweed.
- Flexibility with application including stump swabbing.
- Safe to most desirable grasses.

### Available in

20 & 100 Litres

### Active Ingredient

300g/L triclopyr as the butoxyethyl ester & 100g/L picloram as the trisopropanolamine salt

# Donaghys Brushweed Kill TRI 600

Registered Pursuant to the ACVM Act 1997 No. P7981

## For the control of brushweeds and many broadleaf weeds

- Controls gorse, broom, blackberry and other brushweeds.
- Controls broadleaf weeds in turf.
- Safe to most desirable grasses.
- Best results achieved when applied during active growth.
- Flexibility with application including stump swabbing.

### Available in

20 & 100 Litres

### Active Ingredient

600g/L triclopyr as the butoxyethyl ester

# Donaghys Slugicide

Registered Pursuant to the ACVM Act 1997 No. P7691.

## Kills slugs and snails in pastures, crops and gardens

- Use prior to and when direct drilling new pastures.
- Prevents or treats slugs which migrate into new / conventionally established pasture or crops.
- Contains a unique attractant to lure slugs and snails to the bait.
- Metaldehyde active ingredient does not harm carabid beetles (natural slug predators) unlike methiocarb based baits.
- Stable pellet formulation - all weather, low dust product.

## Available in

20kg

## Active Ingredient

18g/kg  
metaldehyde

# Donaghys Wetter Sticker

## Surfactant for use with certain herbicides

- Improves the wetting, spreading and uptake of herbicides.
- Reduces rain free period required after herbicide application.
- Use with Donaghys Premium Sprayoff G360 glyphosate, and Brushweed Kill MET600 (see respective labels for details).
- Increases herbicide uptake on hard to wet surfaces such as waxy leaves.

## Available in

5 Litre

## Active Ingredient

100%  
organosilicone

## Donaghys Mycotak®

Registered Pursuant to the ACVM Act 1997 No. P7033.

### For the control of the causal organism of Facial Eczema in pasture

- Prevents facial eczema in animals.
- Eliminates the spores in pasture that cause toxins to build up in the liver.
- Provides six weeks protection.
- No withholding period.
- Unlike Zinc, will not interfere with the cows calcium metabolism or copper absorption.
- Compatible with Donaghys nitrogen utilisation enhancer, LessN®.

#### Available in

1 & 5kg

#### Active Ingredient

800g/kg  
carbendazim in the form of a water dispersible granule

## Donaghys Myco-RF®

Registered Pursuant to the ACVM Act 1997 No. P7625.

### For the control of Rust and Fusarium species in pasture and Crown Rust and Stem Rust and Blind Seed in ryegrass seed crops

- Controls Rust and Fusarium in pasture resulting in cleaner, healthier and more palatable pasture.
- Prevents the slowing of growth, rate of aging and death of grasses caused by Rust and Fusarium.
- Increase dry matter production of Rust and Fusarium affected pastures.
- Reduces ill thrift in stock caused by Rust and Fusarium.
- Compatible with Donaghys nitrogen utilisation enhancer, LessN®.

#### Available in

1kg

#### Active Ingredient

800g/kg  
tebuconazole in the form of a wettable powder

## Donaghys Mycowet®

### To enhance the spreading and foliage deposition of Mycotak® and Myco-RF® fungicides

- Is a non-ionic organosilicone 'Super Spreader' surfactant blend for the application of Donaghys Mycotak® and Donaghys Myco-RF® fungicides.
- Lowers the surface tension of spray solutions well below commonly used surfactants.
- When used according to directions, will reduce off-target spray drift by up to 25%.
- Is especially suited to situations where coverage is critical and is particularly suited to low volume spraying and aerial applications where water coverage is a limiting factor.

#### Available in

1, 5 & 20 Litres

#### Active Ingredient

Contains a proprietary organosilicone/organic fluid blend

Donaghys is a **world-leading** manufacturer and distributor of **innovative** and **reliable** products that provide effective solutions for the rural, industrial, marine and aquaculture markets.
