

Lektor

A selective herbicide for the control of broadleaf weeds in grain and silage maize that can be used at pre and post emergence.

ACTIVE INGREDIENT: 480 g/L Mesotrione in the form of a suspension concentrate.

- Low use rates from 150 – 200mL/ha at the post-emergence stage
- Lektor is absorbed through the leaf, shoot and root of the weed which inhibits weed growth
- Long acting residual activity of up to 10 weeks
- Provides a high level of crop protection from weeds to improve yield
- Lektor can control a wide range of broadleaf weeds
- Controls Bathurst bur, black nightshade, chickweed, dandelion, fathen, (includes triazine resistant fathen), fennel, fishtail oxalis, galinsoga, hairy nightshade, mallow, redroot, seedling docks, spurrey, stagger weed, twin cress, willow weed and wireweed.

Withholding periods and soil residuals:

- Grain maize and green feed/silage: 70 days from the last application
- Allow at least 6 months before sowing white clover or ryegrass Allow at least 12 months for legume crops such as lucerne, peas and red clover.

Application rate for maize:

- Pre-emergence: Use 350-450ml per hectare
- Post-emergence: Use 150-200ml per hectare

Application time:

- Pre-emergence: Apply to the freshly prepared seedbed immediately after planting and before crop emergence.
- Post-emergence: Apply to weeds up to the 8 leaf stage. Providing the spray has dried on the foliage, light rain after post emergent spraying will not affect the results. Otherwise, rain within 3 hours of treatment may reduce effectiveness.

Application type:

- Boom spraying: Use 100-300 litres of water per hectare. Use the higher volumes when used in conjunction with other herbicides and when spraying larger weeds. Do not use strainers finer than 300 micrometers. Dry conditions following application may reduce pre-emergence effectiveness. If activating rain is not received with 7-10 days after a pre-emergence application, rotary hoeing is recommended to activate the herbicide.

Product Codes:

Code	Product	Unit	Qty per Unit	Barcode
