

Donaghys ProDairy®

Donaghys ProDairy® is a scientifically formulated probiotic extract designed to enhance digestion, feed conversion and increases milk production. It aids the establishment and performance of healthy rumen microbes which are required for efficient digestion and overall performance of dairy cattle.

BENEFITS:

- Donaghys ProDairy® can be used throughout the year to reduce the negative impact of lush pasture, feed changes and external stresses such as climate, heavy grain feeding and at crucial times of pre-calving, calving and mating.
- Donaghys ProDairy® helps dung firming and can aid in reducing acidosis.
- Can be used on young stock at weaning.
- Comes in 20 and 200 litre pack sizes.
- Nil withholding period.

DIRECTIONS FOR USE:

Donaghys ProDairy® can be administered orally, through an inline dispenser or through a water system using Donaghys torpedo dispenser.

DOSE RATES:

Calves: Weaning	10mL single dose then 4 weekly.
Cows: 1 month prior to calving	10mL / Head / Day.
Cows: Calving to mating	5 – 10mL / Head / Day **
Cows: Post mating to end of lactation	5 – 10mL / Head / Day **
Bulls: Strategic dose when needed	20mL at feed change or stress
Steers: Strategic does when needed	15mL at feed change or stress

** use higher rate (10mL) if dietary scouring on lush pastures occurs or when grain/concentrate feeding.
